

# AI Automation Starter

Beginner workflows with n8n (Cloud-first)

Book 3 of 3

## What you'll build

- Bills organizer (photo/PDF → filed + logged)
- Lead follow-up so nobody is forgotten
- Daily/weekly reports (trust your automations)
- Safety: approvals, retries, privacy checklist
- 24 prompts on the web (one-tap copy)

**Default: n8n Cloud (fast, stable). Self-host is optional.**

## Open the Prompt Library

<https://leonelulloa.com/prompts/en/ai-automation-starter>

Tip: Read in PDF. Copy prompts on the website.

# Start here (5 minutes)

- 1 Choose n8n Cloud (recommended)
- 2 Fill your Snapshot once on the website
- 3 Scan QR / tap link → Copy personalized prompt

**Each prompt asks max 3 questions if something is missing.**

## Your Snapshot (short)

- Business context (what you do)
- Top use case (what to automate first)
- Tech level (non-tech / medium / technical)
- Time budget (hours/week)
- Tools you use (Google/Notion/Slack/Shopify...)
- Trigger channel (Email/Telegram/WhatsApp/Form)
- Volume (items per week)
- Constraints (budget/privacy/must-haves)

## Recommended path

Day 1: P-01 → P-02 → P-05

Day 2: P-06 → P-08 → P-10

Day 3: P-11 → P-12 → P-19

Day 4: P-16 → P-17 → P-22

Day 5: P-23 → P-24

P-01

Strategy

# Choose the right path (Cloud vs self-host)

## What AI can do

AI can recommend the simplest setup based on skill, time, and risk.

## Mini example

Output: your best setup + 7■day plan.

## Prompt preview (copy on web)

You are an automation advisor. Help me choose the right setup.

Snapshot:

- Business: {{business\_context}}
- #1 use case: {{top\_use\_case}}
- Tech level: {{tech\_level}}
- Time budget: {{time\_budget}}
- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Volume: {{volume}}
- Constraints: {{constraints}}

## Open this prompt

<https://leonelulloa.com/p/01>

P-02

Strategy

# Automation ROI: pick the top 3 workflows

## What AI can do

AI can rank automations by time saved, impact, complexity, and risk.

## Mini example

Output: top 3 + what to build this week.

## Prompt preview (copy on web)

Act as a small-business automation strategist.

Snapshot:

- Business: {{business\_context}}
- Use case idea: {{top\_use\_case}}
- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Task:

- 1) Propose 10 beginner-friendly automations (no coding).
- 2) Rank: Time Saved / Revenue Impact / Complexity / Risk.

## Open this prompt

<https://leonelulloa.com/p/02>

# Tool stack map (what connects to what)

## What AI can do

AI can turn your tool list into a clean integration map.

## Mini example

Output: source of truth + fields + cleanup checklist.

## Prompt preview (copy on web)

Create an integration map for my business.

Snapshot:

- Business: {{business\_context}}
- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Constraints: {{constraints}}

Task:

- 1) Identify systems of record (where data should live).
- 2) Identify inputs (email/DM/forms).
- 3) Identify outputs (notifications, docs, CRM updates).

## Open this prompt

<https://leonelulloa.com/p/03>

P-04

Strategy

# Cost planner (executions, AI calls, storage)

## What AI can do

AI can estimate cost drivers and add guardrails so beginners stay safe.

## Mini example

Output: safe design + monitoring checklist.

## Prompt preview (copy on web)

Act as a cost planner for automations.

Snapshot:

- Volume: {{volume}}
- Tools: {{tools}}
- Constraints: {{constraints}}
- Use case: {{top\_use\_case}}

Task:

- 1) Estimate main cost drivers (executions, AI calls, storage, APIs).
- 2) Propose a SAFE design that caps cost (rate limits,

<https://leonelulloa.com/p/04>

P-05

Automation

# n8n Cloud quickstart (safe beginner setup)

## What AI can do

AI can generate a step-by-step setup checklist (credentials + testing).

## Mini example

Output: setup checklist + first test workflow.

## Prompt preview (copy on web)

You are a n8n onboarding coach for beginners.

Snapshot:

- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Tech level: {{tech\_level}}

Task:

- 1) Beginner checklist to set up n8n Cloud safely.
- 2) Build a first test workflow: trigger → log → notify.
- 3) Explain how to test without breaking anything.
- 4) Explain how to store secrets safely.

## Open this prompt

<https://leonelulloa.com/p/05>

P-06

Automation

# Workflow blueprint generator (nodes + data fields)

## What AI can do

AI can design a node-by-node blueprint you can build in n8n.

## Mini example

Output: nodes + schema + error handling + test plan.

## Prompt preview (copy on web)

Design an n8n workflow blueprint for my use case.

Snapshot:

- Use case: {{top\_use\_case}}
- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Output format:

- 1) Goal
- 2) Trigger node(s)

## Open this prompt

<https://leonelulloa.com/p/06>

# Human approval step (avoid disasters)

## What AI can do

AI can add approvals so automations stay safe and trustworthy.

## Mini example

Output: approval UX + logs + rollback plan.

## Prompt preview (copy on web)

Add a human approval step to my automation.

Snapshot:

- Use case: {{top\_use\_case}}
- Trigger channel: {{trigger\_channel}}
- Tools: {{tools}}
- Constraints: {{constraints}}

Task:

- 1) Identify risk points where approvals are needed.
- 2) Propose an approval UX (Telegram/Email/Slack) with Approve/Reject/Edit.

## Open this prompt

<https://leonelulloa.com/p/07>

# Telegram intake (easy trigger for photos/PDFs)

## What AI can do

AI can design a Telegram intake so you automate from documents fast.

## Mini example

Output: nodes + schema + 5 tests.

## Prompt preview (copy on web)

Design a Telegram intake workflow in n8n.

Snapshot:

- Use case: {{top\_use\_case}}
- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- Send photo/PDF/text → workflow starts
- Extract key fields only if needed
- Store file + metadata

## Open this prompt

<https://leonelulloa.com/p/08>

# WhatsApp trigger (safe beginner options)

## What AI can do

AI can explain WhatsApp options without fragile hacks and propose a safe fallback.

## Mini example

Output: safest approach + backup trigger + 7-day plan.

## Prompt preview (copy on web)

I want WhatsApp as a trigger, but I'm a beginner.

Snapshot:

- Use case: {{top\_use\_case}}
- Tools: {{tools}}
- Tech level: {{tech\_level}}
- Constraints: {{constraints}}

Task:

- 1) Explain WhatsApp automation options (official API, providers, limitations).
- 2) Recommend the safest beginner approach with lowest

## Open this prompt

<https://leonelulloa.com/p/09>

# Bills organizer (photo/PDF → month/type/vendor)

## What AI can do

AI can extract invoice fields and auto-file them consistently.

## Mini example

Output: folder/table schema + workflow nodes + alerts.

## Prompt preview (copy on web)

Design a “Bills Organizer” automation in n8n.

Snapshot:

- Trigger channel: `{{trigger_channel}}`
- Tools: `{{tools}}`
- Volume: `{{volume}}`
- Constraints: `{{constraints}}`

Requirements:

- 1) Input: photo/PDF (utilities, rent, suppliers)
- 2) Extract: vendor, amount, date, category, recurring? (yes/no)

## Open this prompt

<https://leonelulloa.com/p/10>

# Invoice reminders (timed + logged + stop when paid)

## What AI can do

AI can write polite reminder sequences and stop automatically when paid.

## Mini example

Output: schema + schedule + messages.

## Prompt preview (copy on web)

Create an invoice reminder automation.

Snapshot:

- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- Track invoices (sent/paid/overdue)
- Remind Day 3 / Day 7 / Day 14
- Professional tone
- Stop reminders immediately when PAID

## Open this prompt

<https://leonelulloa.com/p/11>

# Appointments + reminders (reduce no-shows)

## What AI can do

AI can generate confirmations/reminders to reduce cancellations.

## Mini example

Output: messages + nodes + status tracking.

## Prompt preview (copy on web)

Design an appointments workflow (beginner-friendly).

Snapshot:

- Business: `{{business_context}}`
- Tools: `{{tools}}`
- Trigger channel: `{{trigger_channel}}`
- Constraints: `{{constraints}}`

Requirements:

- New booking intake (form/email/calendar)
- Confirmation message
- Reminders: 24h before and 2h before

## Open this prompt

<https://leonelulloa.com/p/12>

# Support triage (tag + route + summarize)

## What AI can do

AI can summarize messages and route them fast without auto-reply risk.

## Mini example

Output: tags + summaries + routing rules.

## Prompt preview (copy on web)

Design a support triage workflow.

Snapshot:

- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- Intake messages (email/DM/form)
- Classify: billing / delivery / product / complaint / other

## Open this prompt

<https://leonelulloa.com/p/13>

# Recurring bills due-date alerts (rent/utilities/suppliers)

## What AI can do

AI can standardize recurring bills and notify you before deadlines.

## Mini example

Output: schedule + stop-rules + simple tracking table.

## Prompt preview (copy on web)

Design a recurring bills alert system.

Snapshot:

- Tools: {{tools}}
- Trigger channel: {{trigger\_channel}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- 1) Track recurring bills (rent, utilities, subscriptions, key suppliers)
- 2) Alert: 7 days before + 2 days before + day-of

## Open this prompt

<https://leonelulloa.com/p/14>

# Monthly accountant pack (auto-export + summary)

## What AI can do

AI can create a clean monthly pack (files + summary + totals) ready to send.

## Mini example

Output: folder pack + summary + checklist for missing docs.

## Prompt preview (copy on web)

Create a monthly “accountant pack” automation.

Snapshot:

- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- 1) Collect bills/invoices/receipts for the month
- 2) Ensure naming consistency (Vendor\_Date\_Amount)
- 3) Generate a summary table: totals by category + vendor
- 4) Flag missing items

## Open this prompt

<https://leonelulloa.com/p/15>

# Content ideas factory (weekly, lightweight)

## What AI can do

AI can generate repeatable content ideas from your real business context.

## Mini example

Output: 20 ideas + a 5-post weekly plan.

## Prompt preview (copy on web)

Create a weekly content-ideas workflow plan (no heavy tech).

Snapshot:

- Business: {{business\_context}}
- Tools: {{tools}}
- Time budget: {{time\_budget}}
- Constraints: {{constraints}}

Task:

- 1) Simple workflow: ideas → draft → approval → schedule.
- 2) Generate 20 post ideas + suggested platform.

## Open this prompt

<https://leonelulloa.com/p/16>

# Repurpose pipeline (1 idea → 5 formats)

## What AI can do

AI can repurpose one message into multiple formats consistently.

## Mini example

Output: 5 formats + a storage workflow plan.

## Prompt preview (copy on web)

Repurpose one core message into multiple formats.

Snapshot:

- Business: {{business\_context}}
- Tools: {{tools}}
- Constraints: {{constraints}}

Input message (paste): [YOUR MESSAGE]

Task:

Create:

- 1) IG short post

## Open this prompt

<https://leonelulloa.com/p/17>

# Client onboarding pack (welcome + checklist + folder)

## What AI can do

AI can generate a clean onboarding flow so every new client gets the same experience.

## Mini example

Output: onboarding steps + templates + where to store everything.

## Prompt preview (copy on web)

Design a client onboarding automation.

Snapshot:

- Business: `{{business_context}}`
- Tools: `{{tools}}`
- Trigger channel: `{{trigger_channel}}`
- Constraints: `{{constraints}}`

Requirements:

- Trigger when a new client pays/books/signs up
- Create a client folder with a standard structure
- Send a welcome message + next steps

## Open this prompt

<https://leonelulloa.com/p/18>

# Lead capture → follow-up (beginner system)

## What AI can do

AI can design a lead system so you never forget to reply and close.

## Mini example

Output: capture + reminders + 3 follow-ups (approved).

## Prompt preview (copy on web)

Design a beginner lead system.

Snapshot:

- Business: {{business\_context}}
- Trigger channel: {{trigger\_channel}}
- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- Capture lead (form/email/DM)
- Save lead to a simple table

## Open this prompt

<https://leonelulloa.com/p/19>

# Lead qualification + routing (simple score)

## What AI can do

AI can summarize and score leads so you focus on the best opportunities first.

## Mini example

Output: score rules + routing + a safe human review option.

## Prompt preview (copy on web)

Create a lead qualification + routing workflow.

Snapshot:

- Business: `{{business_context}}`
- Trigger channel: `{{trigger_channel}}`
- Tools: `{{tools}}`
- Volume: `{{volume}}`
- Constraints: `{{constraints}}`

Requirements:

- 1) Intake lead message + key details
- 2) Summarize in 3 bullets

## Open this prompt

<https://leonelulloa.com/p/20>

# Review request + testimonials (after delivery)

## What AI can do

AI can write friendly review requests and organize testimonials automatically.

## Mini example

Output: messages + storage + a simple follow-up system.

## Prompt preview (copy on web)

Design a review + testimonial automation.

Snapshot:

- Business: `{{business_context}}`
- Tools: `{{tools}}`
- Trigger channel: `{{trigger_channel}}`
- Volume: `{{volume}}`
- Constraints: `{{constraints}}`

Requirements:

- Trigger after delivery/completion (or X days after purchase)

## Open this prompt

<https://leonelulloa.com/p/21>

# Daily summary + weekly report (what happened, what failed)

## What AI can do

AI can summarize runs, spot errors, and suggest fixes weekly.

## Mini example

Output: daily digest + weekly improvements + links to failed items.

## Prompt preview (copy on web)

Create a daily + weekly reporting workflow for my automations.

Snapshot:

- Tools: {{tools}}
- Volume: {{volume}}
- Constraints: {{constraints}}

Requirements:

- Daily: runs, successes, failures, top errors
- Weekly: time saved estimate + improvements
- Include links to logs and failed items

## Open this prompt

<https://leonelulloa.com/p/22>

# Error handling standard (retries, dead-letter, alerts)

## What AI can do

AI can add reliability patterns so beginner workflows don't silently fail.

## Mini example

Output: retry rules + dead-letter schema + alert checklist.

## Prompt preview (copy on web)

Create a standard error-handling pattern for my n8n workflows.

Snapshot:

- Tech level: {{tech\_level}}
- Tools: {{tools}}
- Constraints: {{constraints}}

Task:

- 1) Retry rules (when to retry vs stop).
- 2) Dead-letter folder/table for failed items.
- 3) Alert rules (what triggers immediate notification).

## Open this prompt

<https://leonelulloa.com/p/23>

# Privacy & safety checklist (beginner friendly)

## What AI can do

AI can help you avoid risky data handling and build trust-safe automations.

## Mini example

Output: what to store, what not to store, retention, and a transparency note.

## Prompt preview (copy on web)

Create a privacy & safety checklist for my automations.

Snapshot:

- Business: {{business\_context}}
- Tools: {{tools}}
- Constraints: {{constraints}}

Task:

- 1) Identify sensitive data I might handle.
- 2) Recommend what to store vs not store.
- 3) Recommend safe retention (how long to keep data).
- 4) Provide a simple consent/transparency note I can use.
